

A&D Medical WellnessConnected™ UA-651BLE Blood Pressure Monitor features Bluetooth Connectivity. By using the free A&D Connect smartphone or tablet app, users may easily access and track their blood pressure readings over time. Data is automatically and securely stored in the A&D Medical Cloud, allowing the user unlimited storage for blood pressure readings. From the cloud, readings and reports may be accessed with the free A&D Connect app, which the user may use to manage goals and chart progress. Measurements and reports are easily be sent via email, Facebook, Twitter, and Instagram, allowing the user to easily share information with their loved ones or healthcare providers. If a paired smart device is not currently available, the UA-651BLE Home BP Monitor has enough memory to locally store 30 measurements for later upload. Multiple users are supported. See related products below for additional WellnessConnected™ devices for the full user experience.

The Blood Pressure Monitor is clinically validated and measures blood pressure within 3 mmHg. The UA-651BLE Digital BP Monitor uses a pressure rating indicator to let the user if their readings fall outside the average. The UA-290 Blood Pressure Cuff fits users with an arm circumference of 9 - 14.6 inches in circumference. Irregular Heartbeat Detection alerts the user if an irregular heartbeat is detected. The SlimFit™ Cuff uses a gentle inflation mechanism to reduce the risk of misreading and re-inflation.

Digital Blood Pressure Monitor with Bluetooth

- Locally store up to 30 measurements
- Pressure Rating Indicator™
- Gentle inflation mechanism reduces chance of re-inflation
